SOCIISGROUP™
INSTITUTIONAL CHARTER

Status: Controlled Circulation, Internal Alignment
Audience: Circle, Advisors, Companies, Allies, Sovereign Actors (by exception)
Authorised by: Founder & CEO, SociisGroup™

This document is an institutional onboarding briefing designed to align strategic collaborators, advisors, and sovereign actors with the SociisGroup mandate, architecture, and behavioural standard.

1. WELCOME

Welcome inside SociisGroup™.

You are reading this document because you are stepping into a behavioural institution — not a club, not a private network, not a coaching community, not an event brand, not an incubator, not a “mastermind”.

SociisGroup exists to ethically support one billion individuals in taking more conscious decisions in how they behave, responsibly and in line with their deep values.

SociisGroup actions are rooted in Sustainability, Hospitality, and Humanity. Together, these domains ensure our work strengthens not only business performance, but also the quality of decisions, relationships, and environments – raising the standard for leadership, culture, and conscience at every level.

We are not in a classical “membership” organisation.
You are serving a cause and are acting inside an Institution with a mandate and a long-term horizon.

This document is designed for onboarding to understand:

- What SociisGroup is (and is not),
- Why it exists,
- How it is structured,
- How value moves,
- How the divisions interlock,
- What roles exist,
- How pricing and return on engagement actually work,
- And what is expected from you.

2. EXECUTIVE OVERVIEW

2.1 What SociisGroup Is

SociisGroup™ is a **sovereign independent behavioural Institution operating with impact at scale.**

We build unconventionally on Hospitality, Sustainability and Humanity to ethically offer one billion individuals the opportunity to trigger mindset shifts and eventually adopt more sustainable behaviours.

SociisGroup develops one behavioural framework (SBS™) and one behavioural interface (BEE™). Together, they translate values into lived conduct across individual, organisational, and institutional contexts.

We operate through:

- **SBS™** — Sustainable Behavioural Standard
- **BEE™** — Behavioural Engine of Ethics (SaaS), impact at scale
- **Sociis Experiences™** — The 22 / The 64 / The 300
- **Sociis Culture™** — Apparel, art, film, Let There Be Light™
- **Sociis House™** — Behavioural literacy, reflection & mindset shift environment
- **Sociis Access™** — Curated proximity architecture

2.2 Why SociisGroup Exists

We live in a time of volatility and grievance, where sustainability is often seen as an unnecessary cost.

Planetary boundaries[1] define the limits of human impact on Earth's systems. Beyond these limits, the environment loses its ability to self-regulate – putting humanity at risk. Today, seven of the nine boundaries have been crossed.

We know what to do. Frameworks exist to measure and manage our impact – the Greenhouse Gas Protocol[2] being among the most advanced. The problem is not knowledge. It is behaviour. We do not act on what we know, individually or collectively.

ESG is an outcome of behaviour. SociisGroup operates upstream of ESG, shaping behaviour before outcomes are measured, reported, or regulated.

SociisGroup exists to close this gap – aiming at ethically triggering mindset shifts and eventually enabling at scale more sustainable behaviours, which will unlock business value and restore dignity of the unseen.

In practice, SociisGroup designs a single behavioural framework (SBS™) and operates a single behavioural interface (BEE™) to activate reflection and mindset shifts, deploying this behavioural infrastructure across sovereign, corporate, cultural, and hospitality environments.

2.3 Who Is Inside

Four populations:

1. Sovereign Partners — Private and public corporates having demonstrated ambition to transform the value chains in which they operate, to the best sustainable practices
2. Circle Members — Individuals sharing same values, allies that are willing to support the Sociis strategic ambition and journey
3. Trusted Advisors — Functional contributors & originators
4. Trusted Companies — Behavioural outcome clients

2.4 The 2030 Mandate

By 2030 we aim to:

• Raise consciousness of **1 billion people** to possibly trigger ethically a change in mindset that will drive behavioural change at scale, to enable 9 billion individuals living well and with dignity within the regenerative capabilities of the Planet
• Make behaviour the missing **B** in **ESG,**
• Establish SociisGroup as the Sovereign **Behavioural Institution**.
• Make **BEE™** the behavioural interface layer for AI,

3. INSTITUTIONAL ARCHITECTURE

SociisGroup is organized with 3 layers:

• The Ethical Council,
• The SociisGroup itself,
• The Allies.

3.1 Ethical Council (above)

The Ethical Council is composed of a set of individuals from private or public corporates, national or supranational organisations, serving as an independent body with full authority on the ethical and behavioural integrity of SociisGroup and the long-term trust.

3.2 SociisGroup (The Institution)

The Institution consists in **five permanent divisions:**

1. **Impact™** — Mindset shift triggers behavioural change (SBS/BEE)
2. **House™** — Behavioural literacy, reflection, and mindset shift environment
3. **Experiences™** — Behavioural proof environments
4. **Culture™** — Artistic & symbolic ignition
5. **Access™** — Proximity & participation

3.3 Sociis (The Allies)

These are the **human beings** that share SociisGroup common values and seek individually and collectively to trigger mindset and behavioural shift towards a world where we live all well in dignity within the finite resources of planet Earth.

3.4 The 3 pillars reinforce each other

Not only every action of SociisGroup is rooted in Sustainability, Hospitality, and Humanity, these domains reinforce each other's.

Humanity ensures we build on the reality of the unseen, the homeless, and the most vulnerable among us. Hospitality and iconic experiences draw influencers and media attention to enable impact at the scale that is necessary to trigger a behavioural change: 1 billion individuals.

Sustainability and ethical core values ensure our work is future-proofed, and the standard for leadership, culture, and conscience are raised at every level.

4. THE THREE DOMAINS

SociisGroup multiplies its capability for impact at scale by leveraging three domains – **Culture moves faster than governance.**

1. **Hospitality** — Behavioural environments & dignity
2. **Humanity** — Ethics, identity, empathy, vulnerability - humans at the center
3. **Sustainability** — Behaviour is the missing B in ESG

5. SOCIIS IMPACT™
THE NORTH STAR

Impact at scale is the **raison-d'être** of SociisGroup.

Its mandate is to:

• Identify triggers for mindset shifts, which enable behaviour change (SBS),
• BEE, the interface and app that helps individuals ethically explore inner tensions to trigger mindset shift,
• Deploy behaviour (Sovereigns + Enterprises),
• Govern behavioural content (policy + AI alignment),
• Scientifically legitimise behaviour (academic + cultural)

5.1 SBS™
Sustainable Behavioural Standard

SBS™ (Sustainable Behavioural Standard) is a behavioural framework developed by SociisGroup with the explicit ambition to evolve into a recognised global standard over time.

Its transition from framework to standard requires multi-year adoption, sovereign engagement, institutional validation, and lived proof across organisations and cultures.
SBS is therefore designed as a progressive standardisation roadmap, not a fixed doctrine.

SBS defines the behavioural framework that guides decision making across individual, organisational, and institutional contexts.

5.2 BEE™
Behavioural Engine of Ethics

BEE™ (Behavioural Engine of Ethics) is the behavioural interface layer that makes SBS tangible in daily decision-making.

BEE is not a measurement, compliance, or scoring tool.

BEE enables individuals to identify behavioural friction and make clearer decisions aligned with the SBS framework.

By making these tensions visible, BEE enables mindset shifts that precede behavioural change.

Measurement observes what has already happened.

BEE intervenes before behaviour is formed.

It:
- Is a conversational AI-assisted App
- Works on mobile phones (voice and typing),
- Helps to make better choices,
- Ethical and not judgmental,

6. SOCIIS EXPERIENCES™
PROOF

Experiences put mindset shifts and subsequent behavioural changes in action.

Three formats exist:

6.1 The 22 — Sovereign Lunch

- 22 people
- 1 table
- **The Sociis Trust Rule — Ethical Consent Standard**
    - o Learning and narratives may travel. Personal disclosures do not.
    - o Sharing is permitted only with respect, consent, and ethical intent.
    - o This rule applies to all formats, on-site and online, before, during, and after the experience.
- Learn and share with key decision makers,
- Update on progress,
- Circle can be invited with additional curation.

6.2 The 64 — Gala / Gathering

Two modes:

- **Gala** = hospitality + cultural ignition (e.g. Corinthia)
- **Gathering** = behavioural working dinner

Used for:

- Socialize the SociisGroup vision and ambition,
- Cultural ignition,
- Reputation and visibility,
- Draw media attention,
- Develop content.

6.3 The 300
Immersive Cultural Experience

Example: **Shape Tomorrow Today™ / Love Tomorrow**

Used for:

- Socialize the SociisGroup vision and ambition,
- Narrative ignition,
- Emotional coherence,
- Media attention,
- Impact at scale.

7. SOCIIS CULTURE™
THE CARRIER

Culture moves faster than governance and is the main force to reach out to one billion individuals. It ensures standards leave theory and enter **identity.**

Culture includes:

• Apparel (not merchandising; symbolic & dignified),
• Film & photography,
• Let There Be Light™ (song + framework),
• Artistic collaborations,
• Scenography & spatial storytelling.

Culture makes behaviour **desirable**, not **mandatory**.

8. SOCIIS HOUSE™
Connection & Behavioural Expression

Sociis House is where Sociis stay connected.

It is the environment where conversations, signals and shared narratives continuously shape how behaviour is understood, reflected upon, and embodied over time.

House does **not** operate as a learning platform.

It is a space for:

Reflection through lived experience
Exchange between aligned individuals
Behavioural awareness and alignment
Continuous connection beyond physical environments

Formats include:

In person and remote salons
Digital interaction and dialogue
Deep rooms and structured conversations
Pre and post experience reflection

House is open beyond Access and acts as the **connective layer** of the Institution.

9. SOCIIS ACCESS™
PROXIMITY & PARTICIPATION

Access is a safe and curated place designed for communities of specific members.

Three populations:

9.1 Circle Members
Identity Proximity

Circle Members:

• Operate at high stakes,
• Value behaviour over optics,
• Steward environments,
• Support cultural ignition,
• Contribute to adoption.
• €15K annual access,

They do **not** join to sell, pitch, or hunt.

9.2 Trusted Advisors
Functional Contribution

Advisors:

• Originate Circle/Companies,
• Open sovereign doors,
• Bring expertise,
• Support deployment.

Compensation logic:

• €2.5K annual access,
• 10% net originated,
• No commissions on Sovereigns.

They earn by **contributing**, not **consuming**.

9.3 Trusted Companies
Behavioural Clients

Companies that purchase services on SBS/BEE transformation programs.
They are clients — **not members.**

10. THE LIME CODE™ BEHAVIOURAL COMPASS

LIME = **LIfe + tiME — and everything in between**

Eight principles organised into **Inner Stance & Outward Conduct.**

Inner Stance

1. Clarity
2. Presence
3. Remembrance
4. Integrity

Outward Conduct

5. Courage
6. Restraint
7. Discernment
8. Generosity

LIME informs:

• SBS indicators,
• BEE logic,
• House reflections,
• Access curation,
• Culture aesthetics.

11. PRICING FRAMEWORK (2026)

11.1 Circle

Standard Circle: €15K/year
Includes:
– 1 seat at The 64 Gala
– 1 seat at The 300 Immersive Experience
– Access to Sociis House™

11.2 Advisors

• €2.5K annual
• 10% commission on revenue generated from SociisHouse
• No commissions on Sovereigns

11.3 Companies

• Specific contract to be agreed case by case

11.4 Experiences (Public Baseline)

The 300 — €850 excl. VAT per seat
The 64 Gala — €2,500 excl. VAT per seat
The 64 Gathering — €2,500 excl. VAT per seat (working format)
The 22 — no public pricing (sovereign-use only)

11.5 The 48-Hour Experience (Optional Premium Layer)

The 48-Hour Experience is a curated arc across The 64 and The 300, designed as a continuous high-touch experience rather than two separate events.

Public pricing: **€3,950 excl. VAT**

The 48-Hour Experience includes:
– Priority placement across both experiences
– Concierge continuity across the full 48 hours
– A curated inner-room moment outside the main formats
– A numbered artefact as a symbolic memory anchor
– Limited availability, priority curation applies

This is a premium experience layer, not a bundle of individual seats.

12. GLOSSARY (ALPHABETICAL)

Access

Governance layer that controls proximity to SociisGroup. Not networking, not selling. Ensures alignment, integrity, and non-dilution.

Advisor (Trusted Advisor)

Functional expert serving the Institution. Helps originate Companies and Sovereigns, contributes expertise. Not a “member.”

Adoption

Process where behaviour becomes normalized across individuals or institutions through House and Impact.

Alignment

When behaviour matches stated values and institutional expectations. Required for proximity.

BEE — Behavioural Evidence Engine

Interface designed for individuals to identify inner tensions, which might trigger a mindset shift and subsequently possibly adopt more sustainable and dignified behaviours.

Behavioural Vacuum

Condition where values exist but standards do not. Results in institutional fragility, mistrust, and performative ESG.

Circle (Circle Members)

Curated individuals offered behavioural proximity. Selected for identity, alignment, and contribution.

Company (Trusted Company)

Institutional client adopting SBS/BEE for culture, governance, reporting, compliance, or ethics.

Contextual Return

Return generated through access to relevant environments where identity and behaviour matter (22/64/300).

Culture / Sociis Collections™

Division responsible for symbols, narrative, apparel, installations, and cultural ignition.

Cultural Return

Return generated through meaning, identity, narrative, and symbolic association. Not financial.

Deployment

Integration of SBS/BEE into companies or sovereigns. Managed by Impact.

Discernment

One of the LIME Code principles: clear perception before action; resisting binary simplification.

Experiences / Sociis Experiences™

Proof environments where behaviour becomes visible. (22/64/300).

Extraction Behaviour

Using proximity to sell, pitch, or farm relationships. Violates Access governance.

Governance

Rules, standards, and behavioural expectations that ensure institutional integrity and continuity.

House / Sociis House™

Behavioural adoption and literacy engine. Delivers lenses, psychology, AI ethics, and behavioural education.

Identity Return

Return generated by becoming part of a story that reinforces identity and meaning. Non-transactional.

Impact / Sociis Impact™

Division owning SBS/BEE, governance, deployment, and sovereign legitimacy.

Institution

A sovereign entity with governance, continuity, legitimacy, and standards. Not a community or network.

I**nstitutional Return**

Return generated through standards, credibility, legitimacy, sovereign context, and long-term trust.

Legitimacy (Sovereign Legitimacy)

Credibility recognized by governments, institutions, corporates, and academia. Comes from standards and governance, not hype.

LIME Code™

Eight behavioural principles across “Inner Stance” and “Outward Conduct”: Clarity, Presence, Remembrance, Integrity, Courage, Restraint, Discernment, Generosity.

Membrane Enforcement

Mechanism protecting the institution by filtering misaligned individuals and behaviours quietly and decisively.

Persona

Public mask or performance driven by optics. Opposite of stewardship; increases fragility.

Proof Environment

Structured environment (22/64/300) where behaviour becomes visible to self and others.

Proximity

Contextual access to people and environments based on alignment. Not networking, not deal flow.

Proximity Abuse

Using access for extraction, pitching, name-dropping, or optics. Violates membrane.

Relational Return

Return generated by long-term high-trust relationships. Not networking, not transactions.

Restraint

LIME principle: knowing when not to act, speak, post, or retaliate.

SBS — Sustainable Behavioural Standard™

SBS is the system that support individual choices to eventually adopt more sustainable and dignified behaviours.

Signal

What behaviour communicates without speaking. Integrity amplifies signal; ego distorts signal.

Sociis

The people inside the institution, the allies and participants who engage with, learn, and progressively embody the behavioural standard in lived practice over time. They are not members of a club.

SociisGroup™

The sovereign behavioural institution and legal entity responsible for the development of the behavioural framework (SBS™), the behavioural interface (BEE™), institutional governance, and deployment across culture, business, and sovereign environments.

Sovereign (Sovereign Partner)

Institutional actors above Access (ministries, sovereign funds, universities, multilateral bodies). Deploy SBS/BEE at system scale.

Stewardship

Behaviour grounded in responsibility for people, purpose, and continuity. Required for sovereign trust.

The 22

Sovereign proof environment at one table. Behaviour, incentives, and alignment visible in real time.

The 64

Curated cultural and institutional environment. Generates cultural and relational ignition.

The 300

Immersive behavioural culture environment. Youth, culture, media, philanthropy intersect.

Youth Ignition

Cultural adoption through symbols, media, and identity. Driven by Collections and Experiences.

2030 Horizon

Timeline for sovereign adoption of behavioural standards. Aligns with ESG regulation, AI governance, and institutional cycles.

Canonical Reference Note:

This document is the institutional reference for SociisGroup.
Any future commercial updates (pricing, packaging, offers) must be reflected here before external communication.

[1] Planetary boundaries define a scientific framework identifying nine global processes essential for maintaining Earth's stability,
within which humanity can safely operate. Seven of these nine boundaries—climate change, biosphere integrity, land-system change,
freshwater change, biogeochemical flows, novel entities, and ocean acidification—are now considered transgressed, signaling high
risk of irreversible environmental shifts.

[2] The Greenhouse Gas Protocol is the most widely used framework that set the standards to measure and manage emissions.
